EDUCATION

Netaji Subhas University of Technology <i>Bachelor of Technology in Instrumentation and Control Engineering</i> • CGPA: 7.35/10	New Delhi, India 2022 – 2026
New Multan Nagar Senior Secondary School <i>CBSE Class XII – 85%</i>	New Delhi, India 2021
New Saraswati Public School <i>CBSE Class X – 92.8%</i>	New Delhi, India 2019

EXPERIENCE

AI Engineering Intern <i>WeBuildTech</i>	Present <i>Gurugram, India</i>
- Contributing to the maintenance and feature development of an enterprise workforce management platform using NestJS, TypeScript, Prisma, and PostgreSQL. - Developed backend APIs and database workflows for a role progression system, enabling administrators to manage employee transitions such as Developer to Senior Developer and Technician to Cloud Developer. - Implemented Role-Based Access Control (RBAC) and optimized PostgreSQL queries using Prisma ORM to improve backend security and database performance. - Tested REST API workflows and business logic to ensure reliability, scalability, and readiness for production integration.	

PROJECTS

Spotify Data Pipeline <i>Azure Databricks, Apache Spark, Delta Lake, Azure Data Factory, SQL, Jinja</i>	
- Built an end-to-end data engineering pipeline using Azure Databricks and Apache Spark, implementing the Bronze–Silver–Gold Medallion architecture to ingest, process, and transform Spotify streaming data. - Designed Delta Lake-based dimension and fact tables including DimUser, DimTrack, DimArtist, and FactStream to support scalable analytics and efficient querying. - Automated data ingestion and transformation workflows using Azure Data Factory and dynamic SQL generation with Jinja, improving pipeline flexibility and maintainability.	
Heart Disease Prediction using Machine Learning <i>Python, Pandas, NumPy, Scikit-learn, FastAPI</i>	
- Developed a machine learning model to predict the likelihood of heart disease using patient health data and clinical parameters. - Performed data preprocessing, missing-value handling, feature selection, exploratory data analysis, and model evaluation using Pandas, NumPy, and Scikit-learn. - Implemented and compared machine learning algorithms including Logistic Regression and Decision Trees, achieving approximately 85–90% prediction accuracy. - Integrated the trained model with FastAPI to expose prediction functionality through REST API endpoints.	

TECHNICAL SKILLS

Programming Languages: Python, SQL, TypeScript, JavaScript
Databases: PostgreSQL, MySQL
Backend & APIs: NestJS, Node.js, FastAPI, REST APIs, JWT, OAuth, RBAC, API Integration, Microservices
Data Engineering: Apache Spark, Azure Databricks, Azure Data Factory, Delta Lake, ETL, Medallion Architecture, Data Modeling, Jinja
Machine Learning & NLP: Scikit-learn, Pandas, NumPy, NLP, Embeddings, Model Evaluation, Fine-Tuning, Deep Learning Fundamentals
AI & Generative AI: Retrieval-Augmented Generation (RAG), Generative AI, LLM Applications, Prompt Engineering, Transformer Models, AI Agents
Analytics & BI: Power BI, DAX, Power Query, Tableau, Microsoft Excel, Data Cleaning, Exploratory Data Analysis
Developer Tools: Git, GitHub, VS Code

CERTIFICATIONS & ACHIEVEMENTS

Generative AI and ChatGPT Fundamentals <i>GeeksforGeeks</i>	<u>Certificate</u>
Solved 150+ SQL problems on LeetCode and SQL Practice, strengthening proficiency in joins, subqueries, aggregations, window functions, and complex data querying.
